

It can't be this easy! I made a total of four calls, went on one appt, and signed it up today!

I have been trying to buy a house for 2 years and have had no success. After a serious bout of phone fright, I made three calls that ended badly, then I took Bill's advice and got into the mindset of being a consultant.. It worked! I am buying a 190,000 house for 3,300 down, (setup fees) and 1250 per month!!! If I didn't want to move into this house, I would make about 500-600 per month in cashflow, plus about 5k-10k upfront.

Thanks to all you folks at NARS for the help in figuring out the paperwork. This is the first of many properties that I will be buying with the pactrust system.

This system is amazing. I don't feel like I took advantage of anyone, which means a lot to me.
